DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Applicant is required to elect:

One of the following HCV enzymes, or a combination thereof (claim 4):

(a) HCV NS3 protein (claims 2 and 37) or (b) HCV NS5b RNA-dependent RNA polymerase (claims 3 and 38)

One of the following immunomodulatory agents, or a combination thereof (claims 21, 22, and 27-33):

(i) IFN- γ (claims 5), (ii) pirfenidone (claim 6) (iii) a TNF antagonist (claims 7 and 8), or (iv) thymosin- α (claim 9)

If (iii) is elected, Applicant is further required to elect one of the antagonists identified in claims 8 and 28.

One of the nucleoside analog from

(A) ribavirin (claims 11 and 30), (B) levovirin (claims 12 and 31), (C) viramidine (claims 13 and 32), (D) an L-nucleoside (claims 14 and 33).

Art Unit: 1648

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species as indicated in the listing above.

Claims 1 and 16-20 are generic

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the common technical feature of the claimed inventions is the combined administration of IFN- α , an immunomodulatory agent, and an inhibitor of an HCV enzyme for the treatment of HCV. Such a method is suggested by the teachings of Farmer et al., U.S. 2003/0134889 (of record in the May 1, 2007 IDS). See e.g. claims 33-37. Unity is therefore lacking.

Conclusion

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1648

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
